ABOUT THE COMPANY

BIONIKA Medline Orvostechikai Kft. is a member of the Swedish-Hungarian group of companies. It was founded in 1989. The owners of the company are Swedish and Hungarian citizens. We have more than 30-year-experience in the field of medical instruments and implant development, production and trade. BIONIKA as a researcher, developer, manufacturer and distributor is present in dentistry, oral surgery, traumatology, orthopedics and rehabilitation in the medical-professional areas. According to our objective and perception, we attach great importance to the word „BIONIKA”, which marks a scientific thinking on the boundaries of biology, technology and electronics that combines these three areas in our researching and developing work.

Clinical and technological experiences: The continuous process, combination and utilization of clinical and technological experiences in development contributes to our success, up to the production base. Here you will find the best solutions and constructions suited to customer needs, which are under continuous development.

Development: The owners of BIONIKA put great emphasis on continuous product and technological research and development. Our products are developed in close collaboration with doctors and engineers, enabling us to ensure the worldclass quality and practical utilization.

Quality: The quality of the products expected by our customers is guaranteed by design, manufacturing and quality management according to the harmonized European Union laws. The BIONIKA Medline Kft. is operated according to the EN ISO 9001 and the EN ISO 13485 quality management system. Our products are provided with CE marks.

Guarantee: After inserting the implant - the risk of the ossification process is assumed by BIONIKA, independently of cause and effect relationship – exchange guarantee is ensured within one year after the purchase. Otherwise, we provide a long-term, 10-year guarantee for our products.

The characteristic properties of the SLIM Implant System

Due to the distinctive characteristics of the SLIM Implant System, this is one of the most suitable solution not only for average hard but in the case of softer bone structures as well. Meeting the minimum invasive requirements, the surgery can be performed by small exploration, possibly transgingivally. Due to the same characteristics it is the most optimal construction for immediate loadness.

- Radius-shaped thread edge
- Cycloid thread profile
- High thread pitch
- High thread depth
- Conical, self-compressional thread adjusted to the natural tooth root
- Thin, pointed, conical ending

SLIM Stable

- Aesthetic, Classic or Ball-head design
- Stable neck design (ø2.3 mm)

SLIM Flexible

- Available in Aesthetic, Wide, Classic or H4 (4-groove) head design
- Flexible neck - up to 20°, with RadialFix grooves below the platform switching

SLIM Flexible mini

- The mini version of Slim Flexible
- Available in Flexible, Aesthetic, Wide, Classic or H4 (4-groove) head design
- Bendable neck - up to 20°, with RadialFix grooves below the platform switching

flexible neck

Slim Compact

Slim Compact is a new member of the BIONIKA Slim Implant family. By adapting the Multi-unit solutions of two-phase implant systems, we have created the Slim Compact, which extends the need for single-phase implants beyond the use of cemented dentures to the widespread use of screw-retained solutions.
